Club Membership

"Your Beauty Bank"

Our objective, at Re:nu180, is to offer aesthetic treatments to everyone that has the desire to feel young and vibrant but thought that these types of treatments were not financially accessible to them, all while maintaining the highest level of service and customer satisfaction.

If you can afford a cup of coffee in the morning, you can afford to look fantastic! That's why we designed a club membership that not only gives you great sale prices every day, because we know that you can't always wait for the next sale to come around, but also is designed for you to maximize your treatment dollars and only pay for the product that you actually use.

Example: Jen signs up for the \$100/month tier in January. When she arrives at Re:nu 180 in March, she has \$300 in her Beauty Bank account. She gets 40 units of Dysport (Botox equivalent of 20 units). Her total club price is \$224. Jen still has \$76 remaining in her club account, which will always be there for future treatments, in addition to her monthly recurring deposits. If Jen's treatment had cost more than the amount in her account, she would use her account dollars first and pay the difference in cash or credit (at her club price) upon completing her treatment.

There are no contracts or cancellation fees. Jen can cancel at anytime and the remainder will be refunded to her in the form of a check. Jen will only be able to join our club and enjoy the best pricing and experience one time each year. So if she cancels she will have to wait 12 months to rejoin. This is so we can maintain the integrity and benefits of our club to our committed members.

Club Pricing

At Re:nu180 Medspa our pricing is based on a per unit measure. To some this may seem like a strange concept, especially when you are trying to assimilate cost to a facial region. Our approach is unique for every client and every client deserves a treatment plan that fits their needs and lifestyle.

Our club pricing is based on a monthly subscription model, while we realize you won't be visiting every month, it gives you 2 great benefits. 1) Our clients are able to absorb the cost of treatment over months versus upfront costs. 2) Based on our model you will also receive up to 30% off our already competitive per unit/syringe prices.

We guarantee our treatments will always be mixed to the manufacturer's specified ratios and you will never pay by "The Area".
